

YAVUZ SELİM ŞAHİN

Software & Database Specialist

As a professional PHP developer with 10 years of experience, I have extensive experience in software development. I have developed projects at all levels using JavaScript and popular libraries AJAX and jQuery along with PHP. I effectively use the CodeIgniter framework in backend development processes. In addition, I continue to improve myself on modern technologies such as React Native, Flutter, Node.js, Python and Artificial Intelligence in order to expand my competencies in the software world.
